## TFS SAILS THROUGH QUALITY REVIEW

TIME & Frequency Solutions (TFS), manufacturers of precision timing systems, have sailed through the recent quality review and have been reapproved as being compliant to the ISO9001:2008 standard.

The approval is applicable to the TFS Quality Management System in the design and manufacture of timing systems, frequency standards and ancillary supporting equipment. The review was carried out by Lloyd's Register Quality Assurance in February, and a new certificate of approval is now on its way.

Neil Pitman, Managing Director of TFS, said "We take quality very seriously, and I am delighted that this reapproval demonstrates yet again our on-going commitment to quality and excellence".

*More...*

According to ISO (International Organization for Standardization), the ISO9001:2008 standard “specifies requirements for quality management system where an organization needs to demonstrate its ability to consistently provide product that meets customer and applicable statutory and regulatory requirements, and aims to enhance customer satisfaction through the effective application of the system, including processes for continual improvement of the system and the assurance of conformity to customer and applicable statutory and regulatory requirements.”
